

Case Study Cribbs Causeway, Bristol

Cribbs Causeway in Bristol is the premier shopping destination in the South West of Britain. With over 135 top name stores, 18 cafes and restaurants, the Mall provides over 995,000 square feet of retail and leisure space.

Access Covers

The centre-piece of the indoor shopping mall is the impressive fountain which shoots water up to the ceiling. Visitors treat it like a wishing well and throw in their spare change, making approximately £10,000 a year for the Fountain Charity Fund.

Due to the very nature of the fountain and its prominent location in the mall, access to the under floor power supply, electrical pump and mechanical equipment posed a problem however, regular cleaning and maintenance was required.

Howe Green installed its 7500 series aluminium floor covers which are tamper resistant and heavy duty, providing the maintenance team with quick, easy and safe access to the concealed mechanical equipment. The stainless steel bolts used to secure the product in place are stiletto heel proof, making them perfect for use in a busy modern day shopping centre like Cribbs Causeway.

The floor covers were purpose designed to fit flush with the floor to prevent tripping or slipping and to maintain the quality of its surroundings. The covers are double-sealed to meet the highest standards of hygiene and security.

Installed quickly and unobtrusively into all types of floor finish, from ceramic tiles, marble and resin to terrazzo or parquet, Howe Green aluminium floor covers are situated throughout Cribbs Causeway, from pedestrian passageways to individual stores and food courts, blending in effortlessly.
